Amazon Quantum Ledger Database (QLDB) and Amazon Managed Blockchain provide the right tool for each job. Both of these fully managed services help companies manage business transactions that require full auditability, and remove the complexity and undifferentiated heavy lifting involved in implementing and managing a ledger database or creating and managing a blockchain network.

Blockchain on AWS

Customer to customer (C2C) markets provide an innovative way to allow customers to interact with each other. Traditional markets require business to customer relationships, in which a customer goes to the business in order to purchase a product or service.

Customer to customer - Wikipedia

In economic terms, electricity (both power and energy) is a commodity capable of being bought, sold, and traded. An electricity market is a system enabling purchases, through bids to buy; sales, through offers to sell; and short-term trades, generally in the form of financial or obligation swaps. Bids and offers use supply and demand principles to set the price.

Electricity market - Wikipedia

Art market, physical or figurative venue in which art is bought and sold. At its most basic an art market requires a work of art, which might be drawn from a very wide range of collectible objects; a seller; and a buyer, who may participate directly in negotiations or be represented by agents.. Historically, some of the most significant art transactions have taken place outside the framework
